SCHEDULE OF BUSINESS - NOVEMBER 2, 1951

Construction Items

Route 44, Section 17A

1. Approval is recommended of the plans and specifications, and of advertising for bids for the construction of Route 44, Section 17A, from Hollywood Avenue to Hook Road, Deepwater, Salem County, including bridge over New Jersey Turnpike and Salem Canal, and bridge over Route 44 at Plant Street Relocation. Bids to be received on November 27, 1951.

Route 25A, Section 1H

2. Approval is recommended of the plans and specifications and authority to advertise after approval has been received from the Bureau of Public Roads, for the Paving, Bridges and Retaining Walls on Route 25A, Section 1H, from High Street to Broad Street, City of Newark, Essex County, Federal Aid Project No. U-187(6).

Palisades Interstate Parkway, Secs. 2D & 1B

3. The Circle Construction Corporation, contractor for the Grading on Palisades Interstate Parkway, New Jersey Sections 2D & 1B, from Station 166+00 to Station 214+30 North of Clinton Avenue, Boroughs of Englewood Cliffs and Tenafly, Bergen County, has satisfactorily completed the work under its contract as of September 26, 1951, andit is recommended that this project be accepted and final payment authorized after the necessary formalities have been observed.

Route 43, Section 12C

4. It is recommended that an extension of time of seven calendar days be granted to the Union Paving Company in connection with its contract for the dualization of Route 43, Section 12C, from Hamburg Avenue, Egg Harbor City, to Union Avenue, Elwood, Atlantic County, which will extend the specified date of completion from August 1 to August 8, 1951; and that liquidated damages be charged for the further overrun of 21 calendar days to August 29, the date of completion, which at $106.40 per day amounts to $2,234.00. A large amount of additional unsuitable material was encountered at unanticipated locations here and there throughout the job which had to be removed and replaced; and it is felt that an extension of time of seven calendar days is justified considering the fact that there were 11 days on which the contractor could not work because of rain and wet subgrade conditions. Actually, the project was opened to traffic throughout on August 1st.

Rt. 4 Parkway, Sections 1C & 2D

5. By Order made under date of March 22, 1951, liquidated damages for overrun of the specified time for completion were suspended until April 1, 1951, in connection with the contract of the Union Paving Company on Route 4 Parkway, Sections 1C & 2D, from Route 35 to the Port Reading Railroad. Because of intermittent rains and resultant saturated soil conditions, it was not possible for the contractor to perform any appreciable amount of work toward completing the topsoiling and seeding on this project until thelatter part of April 1951. Furthermore, Change of Plan #10, dated April 27, 1951, added some 1900 feet of additional wire fencing to the contract, particularly to protect children in a new development immediately adjacent to the southerly end of the project. As a consequence, it is recommended that the time for completion be extended to May 1, 1951, and the contractor charged with liquidated damages to May 10, 1951, the recorded date of completion, or nine calendar days at $158.9984 per day amounting to $1,430.99.

Route 44, Section 15

6. The Weldon Contracting Company has completed satisfactorily, as of October 15, 1951, the work between Station 548+0 and 601+0, a distance of 5300 feet, on Route 44, Section 15, Grading from Berkeley Road to Repaupo Road, Gloucester County, Federal Project F-122(8), and it is recommended that the contractor be relieved of maintenance of this completed portion of the project in accordance with the provisions of R.S. 27:7-44.2.

Route 26 Ext., Section 2B

7. Approval is recommended of request of Cayuga Foundation Corporation, contractor for the construction of Route 26 Extension, Section 2B, from Perry Street to P.R.R., Belvidere and Delaware Branch Bridges, Retaining Wall andGrading, in the City of Trenton, County of Mercer, Federal Project No. UI-190(6), to sublet Item 42, Metal Railing, to Fabcon, Inc., Dover and Stokes Avenues, Trenton, New Jersey. Administration - Claims Item

Accounting - Claims

5. There is presented a claim arising out of an accident occurring on July 1, 1951, on State Highway Route 4, Job 418-M4, involving a vehicle owned by Isidor Traubel and operated by Nathan Karbe, both of New York City. As the result of the aforesaid accident, Highway Department guard rail was damaged and had to be repaired at a cost of $181.58. The State Police, in reporting the accident, indicated that the posts holding the wire cables were in a deteriorated state. The insurance carrier representing the above named debtor has asked that an allowance be made for depreciation with respect to the guard rail posts. The foreman's report substantiates the State Police regarding the condition of the guard rail at the time of the accident in question. The foreman also advised that when repairing the guard rail he used complete sets of offset fittings costing $21.90 which were not on the guard rail damaged by Mr. Traubel. Upon investigation, it was ascertained that the guard rail in question was installed 23 years ago and that the debtor was entitled to an allowance for depreciation. The insurance carrier has made an offer to settle this claim in the amount of $136.18 requesting an allowance of $45.40 for depreciation and the cost of 30 sets of offset fittings. The offer appears to be fair and it is, therefore, recommended that it be accepted and that the balance of the claim in the amount of $45.40 be cancelled, in accordance with Mr. Levine's report, and the recommendation of Sackett M. Dickinson, Assistant Deputy Attorney General.

Route 4 Parkway, Sections 6H & 7A

4. A.J. Santaniello, Inc., has requested an extension of time in connection with his contract for placing embankments on Route 4 Parkway, Sections 6H & 7A, from Myrtle Avenue to South Avenue, Cranford, Federal Project U-188(20). 70 working days were specified for completion of this contract. In addition, 7 working days were allowed for additional borough excavation called under Change of Plan #1, or a total of 77 workding days. This time expired on August 25, 1951. At the present time the contractor has completed all the work that can be performed now inasmuch as the ramps which he constructed to reach the top of the high fills are required by the contractors constructing the bridges and will have to be removed before the remaining work can be undertaken. Mr. Santaniello has consented to permit the ramps to remain so as to facilitate the operations of the bridge contractors. The contractors operations were delayed for the following reasons:

1. After the hauling of borrow materia had commenced, Union County posed the bridges being used at considerably less than the legal truck loads which required the contractor to reduce his loads accordingly.
2. After commencing to take borrow from a pit in Westfield, the Town passed an ordinance regulating borrow pit excavation in such a manner that the contractor was forced to make arrangements for a pit in Fanwood which is approximately five miles farther away.
3. Corrugated metal pipe which was scheduled for delivery on June 1 was not received until sometime after July 19.

The contractor completed the three fills involved prior to the award of the bridge contracts and the operations of the bridge contractors were not interferred with in placing the embankments under this contract. It is recommended that an extention of time of 27 working days be granted which will carry the time to December 1, 1951, and that free time be allowed thereafter until such time as the operations of the bridge contractors have progressed to a point where the ramps can be removed, after which an additional 13 working will be allowed for filling in the ramp areas, and top-soiling and seeding the slopes.

DEC 20 1951

WHEREAS pursuant to the provisions of Chapter 253 P. L. 1930, the State of New Jersey did acquire from the Cape May Sand Company, certain lands and premises located in the Township of Lower, County of Cape May, and State of New Jersey designated as Parcel No. 1 on State Highway Route S4C, as particularly shown on a map of said lands entitled "New Jersey State Highway Department Route S4-C Plan showing property to be Acquired from the Cape May Sand Co. for the Ferry Between Cape May Point and Lewes, Del. Lower Twp. Cape May Co. Scale 1" = 50' July 1932" said map being filed in the office of the Clerk of Cape May County on March 22, 1945, Case 1; said lands being acquired specifically for use as a Cape May Ferry Terminal and for a Ferry Slip;

WHEREAS this land lying dormant, unused and unprotected since its acquisition by the State was subject to continued erosion so that most of this land is now under water and is subject to further continued erosion unless protected by the construction of a jetty or other protection at a substantial expense;

WHEREAS the Cape May County Ferry Commission, after making extended surveys and studies during a period of some eight years since 1942, through the engineering firm of James V. Ferry and Associates of Atlantic City, New Jersey, reached a unanimous opinion, in accordance with the findings of said engineers, to the effect that because of prevailing winds and heavy ice formation on the Delaware Bay and other weather hazards to which the Delaware Bay coast of Cape May County is exposed, a landing on this stretch of land could not be possibly made with safety to life and property;

WHEREAS it was further the opinion of the Cape May Ferry Commission that since the creation of the Cape May Canal eliminates the weather hazards by creating a land-locked body of water upon which a ferry could dock and undock with greater safety to life and property, it being the unanimous opinion of the said Commission that the proposed ferry landing should be located inside the mouth of the Cape May Canal and not at the foot of Sunset Boulevard at Cape May Point where the State-owned land is located;

WHEREAS, Mr. Eads Johnson, M.E., the Consulting Marine Engineer and Naval Architect of New York City, employed by this Department specifically for the purpose of making a comprehensive study and report as to the feasibility of a proper location for the construction and operation of a Ferry from Cape May, New Jersey to Lewes, Delaware, and specifically for the final determination of the proper location of the terminals of such Ferry, reported in a communication to this Department dated November 26, 1951 as his final decision, that the property and location owned by the State at the foot of Sunset Boulevard, Cape May Point, is unsuitable as the New Jersey Terminal of the proposed Ferry, and that other properties at or north of the entrance to the Cape May Canal affords the necessary protection for a Ferry Terminal not to be had at the foot of Sunset Boulevard;

AND WHEREAS Mr. Edward W. Kilpatrick the State Highway Engineer, in a memorandum of December 4, 1951 advises that, in view of these opinions and facts the property in question now owned by the State at the foot of Sunset Boulevard at Cape May

Point is no longer required for highway or ferry purposes;

NOW, THEREFORE, I, Ransford J. Abbott, State Highway Commissioner, duly appointed, qualified and presently functioning as such under the provisions of Chapter 1 of Title 27 of the Revised Statutes of New Jersey, do hereby determine that the said lands and premises are no longer required for the use of the State of New Jersey in the construction, improvement, betterment, reconstruction, or maintenance of any State Highway, nor for ferry terminal purposes, and that all right, title and interest of the State of New Jersey in and to such lands and premises shall be sold at public sale to the highest bidder, as authorized by Law.

However, in view of the fact that this award is more than two and a half times the highest value testified to by the State appraiser, and the further fact that the report by Mr. Mathews clearly indicates that the award was excessive, it is recommended that an appeal be taken.

54. This claim arises out of an accident occurring on November 12, 1949, on the Secaucus Bridge, State Highway Route 3, involving a vehicle owned and operated by Thomas Stearns. As the result of the aforesaid accident, ornamental iron fence on the Secaucus Bridge was damaged and had to be repaired at a cost of $119.88. The debtor advised that at the time of the accident he carried no insurance on his vehicle and asked for consideration inasmuch as he had been under heavy expense as the result of the injuries sustained by his wife in the accident in question. He further advised that he is a seasonable employee and his income, therefore, is not steady. In order to dispose of this claim he offered the sum of $75.00 in full settlement. In view of Mr. Stearns' apparent conscientious effort to satisfy his oblication, and giving due consideration to the fact thathe has been under heavy hospital and medical expenses, it is considered the Highway Department would be justified in accepting the officer of $75.00 in full settlement of its claim, and cancelling the balance in the amount of $44.88. Approval of the cancellation is hereby recommended with Mr. Levine's report presented and the recommendation of Sackett M. Dickinson, Deputy Attorney General.

Respectfully submitted,

1. This claim arises out of an accident occurring on September 2, 1950 at the Pleasantville Traffic Circle involving a vehicle owned by Sal's Used Auto Parts and operated by Gaetano Tagliavia of Philadelphia. As the result of the aforesaid accident one electric directionary sign was damaged and had to be repaired at a cost of $135.66.

The debtor, through his attorney, advised that Sol Parello, trading as Sal's Used Auto Parts, was in no way responsible for the accident inasmuch as the driver, Gaetano Tagliavia, was using the vehicle solely for his own business. The debtor is a minor, aged 19, and is about to enter the Army within the next few weeks. There were no witnesses to the accident and the debtor voluntarily reported the happening to the State Police. Mr. Tagliavia advises that at the time of the mishap, he carried no insurance on his vehicle and was in very poor financial circumstances. In order to dispose of the matter amicably before entering the armed forces, he has offered the sumof $50.00 in full settlement of this claim. In view of Mr. Tagliavia's contention that he was crowded into the highway sign by another vehicle while traveling around the circle, it may be difficult, if not impossible, to prove negligence in the event an attempt is made to collect the full amount of the claim by suit. In view of his apparent conscientious effort to satisfy his obligation, and giving due consideration to the foregoing, it is considered the Highway Department would be justified in accepting the offer of $50.00 in full settlement of its claim and cancelling the balance in the amount of $85.66. Approval of this offer is hereby recommended in accordance with Mr. Levine's report, attached hereto, and the recommendation of Sackett M. Dickinson, Deputy Attorney General.

Route 43, Section 12C, Dualization

4. By an Order made under date of November 7, 1951, an extension of time of seven calendar days was granted to Union Paving Company on their contract for the dualization of Route 43, Section 12C, Hamburg Avenue, Egg Harbor City to Union Avenue, Elwood, which extended the specified date of completion from August 1 to August 8, 1951. This same Order directed that liquidated damages be charged for the overrun of 21 calendar days to August 29, 1951, the date of completion. The said liquidated damages at $106.40 per day amounts to $2,234.40. At a conference with the contractor on February 14, 1952, it was agreed that in view of the number of rainy and other days lost through no fault of the contractor, and the great increase in the amount of unsuitable material removed and the loss of time involved, the date of completion should be extended to August 29, 1951. Furthermore, the project was opened throughout its entire length on August 1st and there was consequently no inconvenience to the traveling public after that date. It is therefore recommended that an additional extension of time of 21 calendar days be granted, and that the imposition of liquidated damages be waived.

44. There is presented again the matter of acquisition of property on Route S28, Section 4, Burnet Street from Albany Street to Clifton Avenue; Parcels 15A & 15B, Thomas S. Donato. Condemnation proceedings were previously authorized, at which time the owner was demanding $25,000. An agreement has now been executed and submitted in the sum of $13,000, owner to retain and remove one air compressor and one wall switch from the concrete block building; pursuant to agreement between the State of New Jersey and the City of New Brunswick including provision for conveyance of part of the property to the City of New Brunswick. Bolber, on which an agreement in the sum of $19,000 was previously approved. Examination of title revealed that the City of New Brunswick had secured from the former owners right to construct a sewer pipe affecting Parcel 17B. Inasmuch as Parcel 17B is to be conveyed to the City of New Brunswick, it is recommended that authority be granted to accept title subject to this easement.

Right of Way - Route 25

48. There are presented reports and appraisals with maps and descriptions on Route 25, Section 38, Hackensack River Bridge and Approaches, Parcels 7A,7B & 7C, Mario DelBaglivo (comprising the owner's entire property.) It is recommended that authority be granted to institute condemnation proceedings for the acquisition of the entire property, including these three parcels in fee simple, together with the leases held by Mario DelBaglivo over riparian lands designated as Parcels T-8B and T-8E, extending to the Hackensack River. The owner is demanding $45,000 which is considered excessive. While negotiations are still pending and a settlement may ultimately be reached, the contract for this section has just been awarded and the contractor wants to enter on the property. It is therefore desirable to file the petition as soon as possible pending further negotiations.

Right of Way - Route 29

49. There are presented report and appraisals with map and description on Route 29, Section 7B, Davenport Street, Somerville to Chimney Rock; Parcel 21, Michael Tosco and Sons. As Mr. Massara now indicates he will not institute foreclosure proceedings, it is recommended that the previous action be rescinded, and authority granted to institute condemnation proceedings for the acquisition of this parcel in fee simple. Owner of record is William Hoffman, who cannot be located.

Respectfully submitted,

A. Lee Grover

Located partly within the area of this parcel is a very large fuel tank which may remain in its present location because it will be under the sidewalk area and will not affect our main highway. It was necessary that the existing oil fill line be extended to a point within the future curb line and that the manhole cover be reset to meet the new sidewalk grade. The Schoeller Plumbing Company of Trenton, was previously authorized to proceed with this work based on their bid of $340. During performance of this work it was necessary that certain changes be made involving an additional cost of $78.14, which included substitution of cast iron frame and cover in place of steel, the providing of an opening for fill cap, and the providing of opening in the fill line to permit examination of the oil gauge, all of which was not included in the original estimate of $340. It is therefore recommended that authority be granted to pay the Schoeller Plumbing Company the additional sum of $78.14, making a total of $418.14 for the performance of this work.

Respectfully submitted,

A. Lee Grover

Secretary

SCHEDULE OF BUSINESS - APRIL 4, 1952

Administration Item - Claims

Accounting —
Claims - Damages

1. This claim arises out of a four car accident occurring on January 30, 1951, on State Highway Route 25, Raritan Township, New Jersey, involving Highway Department Buick #15 operated by R.A. Schiavone. As the result of the aforesaid accident, the Department's vehicle was so damaged that it was considered advisable to trade it in rahter than make repairs. The vehicle was purchased new on November 22, 1950, at a cost of $1730.17. At the time of the accident it had traveled approximately 2500 miles. Fitzsimmons & Crisp of Trenton, furnished an itemized estimate agreeing to make the necessary repairs for the sum of $835.70. The damaged vehicle was sold under competitive bid and the Highway Department received the sum of $777.00 on the sale.

A suit was instituted against John L. Davis the owner and operator of one of the vehicles involved and before the matter could be tried, an offer of settlement was made by his insurance carrier in the amount of $925.00. Inasmuch as the figure of settelement is considerably more than the cost of making the necessary repairs, and also giving consideration to the fact that it may be difficult, if not impossible, to prove negligence in the event the matter was tried, it is felt the Highway Department would be justified in accepting the settlement of $925.00 in full settlement of its claim. It might also be pointed out that the Highway Department's own insurance carrier made a contribution in settling a claim brought by one of the other parties involved in the accident.

In view of the foregoing, it is recommended that the sum of $925.00 be accepted in full settlement of this claim and cancel the balance in the sum of $76.57, in accordance with Mr. Levine's report, and the recommendation of Sackett M. Dickinson, Deputy Attorney General.

Deed has been delivered, but payment has not been made because the gasoline pumps encroach one foot on the new right of way line. As this encroachment will not interfere with construction operations, it is recommended that authority be granted to enter into a supplemental agreement providing for: (a) removal by the owner of the pumps upon 30 days written notice from the State and before October 1, 1952; (b) payment by the State of the sum of $6,000 on account, balance of $500 to be retained until gasoline pumps are removed and the right of way cleared.

Offices - Engineering
Garden State Parkway

1. It is recommended that F.E. Harley be authorized to lease a building located on Route 34 approximately two miles south of Matawan for a field office in connection with his contract to perform engineering services on the Garden State Parkway between the Raritan River and Route 33. The building is owned by Joseph Meile, of Jersey City, who is willing to enter into a lease for one year at a rental of $250 per month with an option of renewal from year to year at a rental of $200 per month. The higher rental for the first year is to cover the cost of rearranging the building for our use. Light, heat, and janitor service would not be provided.

The building is approximately 30'x60', and the lease would cover the use of the main floor together with the basement which can be used for the storage of cars, etc., inasmuch as there are large doors which permit of such use. A large area of ground surrounds the building.

It would be the intention and approval is requested on the basis that Mr. Harley would use the building and be reimbursed therefor for the duration of his contract work, after which the lease would be assigned to the Highway Department or to the Highway Authority in the event that Authority is in existence at the time.

Accounting - Claims

20. There is presented a claim resulting from the cost of relocating an Electrical Division concrete pull box located underground on State Highway Route 25, approximately 1123 feet north of Woodlawn Avenue, in the City of Linden, New Jersey. The debtor in this case made application and was granted a permit under date of June 7, 1950, by the Maintenance Division, for an entrance to a drive-in refreshment stand at the aforesaid location. The location of the entrance was upon the basis of plan and recommendation of the debtor's architect. The actual location required the removal to a new location of an existing concrete pull box by the Electrical Division forces of the Highway Department at a cost of $200.67. Debtor preferred entrance at the location where made because it was opposite a break in the center island, but demurred against paying the full amount because he was not advised in advance of the total charges. Because of this, and his present difficult financial situation, debtor offers $100 in full settlement of the Department's claim. In view of the fact that an estimated of the total costs was not communicated to the debtor prior to the commencement of the work, it is considered that the Department is justified in giving his contention some equitable consideration. It is, therefore, recommended that the sum of $100 be accepted in full settlement of the Department's claim and the balance in the amount of $100.67 be cancelled in accordance with Mr. Levine's report presented, and the recommendation of John Warhol, Jr., Deputy Attorney General.

SCHEDULE OF BUSINESS - OCTOBER 14, 1952

Construction Items

Route 1, Section 1-C, and Route 25, Section 3-G

1. The New Jersey Asphalt & Paving Company has satisfactorily completed its contract for the revisions at Tonnele Avenue Traffic Circle & Vicinity, City of Jersey City, Hudson County, Route 1, Section 1C, and Route 25, Section 3G, with the exception of some electrical work which was later added to the contract. It is recommended that the completed work be accepted for payment and and a semi-final estimate issued to the contractor, withholding 125% of the value of the uncompleted work in the amount of $7,558.20.

Route 6, Section 9B

2. The Franklin Contracting Company, contractor for Route 6, Section 9B, Widening, and Northwest Ramp at Valley Road, Township of Little Falls, Passaic County, Clifton, has satisfactorily completed the work under its contract as of June 13, 1952. It is recommended that this work be accepted and final payment authorized after the necessary formalities have been observed.

Route 6, Section 31

3. A.J. Santaniello, Inc., contractor for Route 6, Section 31, Irondale Road to Main Street, Widening & Sidewalk Grading, Mine Hill Township, Morris County, has satisfactorily completed the work under its contract as of September 22, 1952. It is recommended that this work be accepted and final payment authorized after the necessary formalities have been observed.

Route 35, Section 7A

4. A.J. Cunningham & Sons, contractors for the Widening & Resurfacing on Route 35, Section 7A, from Middletown to Keyport, in the Townships of Middletown, Holmdel and Raritan, Monmouth County, Federal Project No. F-4(2), satisfactorily completed the work under their contract as of August 15, 1952. It is recommended that the completed work be accepted for payment and a semi-final estimate issued to the contractor, withholding 1% of the value of the completed work until such time as the "As-Built" plans are completed and final quantities determined. It is to be noted that the contract time for completion of this work was June 15, 1952. As explained in the report presented from the Supervising Engineer, Construction Division, the contractor's operations were delayed by conditions that in a great measure were not anticipated by this Department, such as poor subsurface conditions, lowering of gas main and extra depth excavation due to unstable subsoil conditions. Heavy traffic also contributed to the contractor's delay although every effort was made to facilitate his work. It is therefore further recommended that an extension of time be granted to A.J. Cunningham & Sons for the completion of their contract from June 15 to August 15, 1952, the actual date of completion.

Route 42, Section 3B

STATE OF NEW JERSEY
STATE HIGHWAY DEPARTMENT

SCHEDULE OF BUSINESS - NOVEMBER 24,1952

Construction Items

Route 35, Section 38C

1. Approval is recommended of the plans and specifications and authority to advertise for cleaning channel of Stump Creek on Route 35, Section 38C, in Madison Township, Middlesex County. Bids to be received December 9, 1952.

Route 6, Section 32

2. A. J. Cunningham & Son, contractors for the widening of Route 6, Section 32, Netcong to Lake Hopatcong Road, in the Borough of Netcong and the Township of Roxbury, Morris County, have requested an extension of time for the completion of their contract for which the specified date for completion is November 1, 1952. This request is made due to delays caused by the slowness in acquisition of the necessary right of way and the interference caused by the necessary removal of utility poles, which delays materially impeded the contractor's progress. It is to be noted that the contractor asks for an extension of time until January 1, 1953. Considering the nature of the work yet to be performed, such as water-bound and penetration macadam and bituminous concrete pavement, topsoiling and seeding, and also the possibility of inclement weather, it will be necessary for the contractor to close down his operations for the season and a considerable part of this project will have to be completed early next construction season. Considering the delays imposed upon the contractor through no fault of his, it is recommended that the time for the completion of this project be extended until May 30, 1953.

Route 6, Section 1K

3. The Sette Engineering Company, contractors for the grading on Route 6, Section 1K, Teaneck Road to Grand Avenue, in the Township of Ridgefield Park and Boroughs of Ridgefield and Palisades Park, Bergen County, Federal Aid Project No. UI-117(3), have requested an extension of time for the completion of their contract for which the specified date for completion is November 1, 1952. It is recommended that the Sette Engineering Company be granted an extension of time from November 1, 1952 to February 1, 1953 for the completion of their contract. This recommendation is made, due to the fact that the contractor has been subject to delays in the matter of acquisition of right of way and the completion of bridge abutments under contract to another contractor.

Memorandum to Mr. C. A. Burn:

Submitted herewith is a list of municipalities who have requested highway lighting reimbursement under our 1953 program, involving changes as indicated on the attached tabulation, for a total additional annual cost to the State of $318.40. Sufficient funds are available.

In each instance, the request has been investigated by this office and found to be justified.

In the Borough of Chatham, where vehicular and pedestrian travel has increased in the past fifteen years to such proportions that improved lighting is warranted, we propose to add 4-6000 lumen units along Route 24, to be included in our 1953 reimbursement program.

In the Township of Independence, line charge of $86.40 has been erroneously omitted and it is now our desire to include this item in our reimbursement program with the Township; hence the increase of $86.40.

In the Borough of Middlesex, at the Bridge on Route 28 (Bound Brook Road) a very hazardous condition exists which, in our opinion, warrants the maintenance of a 6000 lumen light on an annual basis, under this program.

In the Township of Raritan, Hunterdon County, at the entrance to the new consolidated school for Flemington-Raritan Township, and at two other locations on Route 30, namely, at the intersection of the new road leading to the Hunterdon Medical Center, and the intersection of New Jersey Avenue, we propose to maintain 3-4000 lumen units.

In the Township of Landis, where we have maintained lighting reimbursement for a number of years, it is now desirable to transfer this account to the City of Vineland, Landis Township having been absorbed by the City of Vineland. This change will effect no alteration in the amount of reimbursement.

It is deemed highly desirable to supplement our present agreements as set forth above. I am, therefore, respectfully requesting that you recommend this portion of our 1953 reimbursement program for the approval of the Commissioner.

An agreement providing for conveyance of these parcels to the State was previously approved. A title search reveals that Public Service Electric & Gas Company has an easement for a pole line over Parcel 65A. This pole line is to be relocated on a service road which will be constructed over Parcel 65B & 65C. It is recommended that authority be granted to accept title to the three parcels subject to this easement.

Right of Way - Rt. 4 Parkway

40. There is presented again the matter of condemnation of property on Route 4 Parkway, Section 12, Bloomfield Avenue to Route S3, Parcels 4A, 4B & 4C, Walter Johnson; on which condemnation proceedings were previously authorized. A title search reveals a sanitary sewer and a storm sewer which affect these parcels. It is recommended that authority be granted to condemn these parcels in fee simple, subject to these sewer easements.

Right of Way - Route 25

41. There is presented again the matter of acquisition of property on Route 25, Section 10, Route S26 to Adams Station Road, together with a report from the Title Officer. An agreement was previously approved with Joseph A. Morrell for Parcel #8, in the sum of $450.00. This agreement was not consummated because of title defects. In the widening of Route 25 this parcel was indicated as Parcel #6, Rose Green, on the map for Route 25, Sections 10A & 11A, from Route S26 to Deans. The same objection as existed to the Morrell title exists as to the title vested in Rose Green. It is, therefore, recommended that the previous action on Route 25, Section 10, Parcel 8, be rescinded, and authority granted to institute condemnation proceedings for the acquisition of Parcel 6 (Route 25, Sections 10A & 11A) in fee simple.

Right of Way - Rt. 26 Ext.

42. There are presented report and appraisal with map and description on Route 26 Extension, Section 1, from the Delaware River Bridge to Perry Street; Parcel 43, Owner unknown. 43. There are presented report and appraisals with map and description on Route 28 (1927), Section 30, Bethlehem-Union Township Line to N. J. Women's Reformatory; Parcel 36, Frank Landon. It is recommended that authority be granted to institute condemnation proceedings for the acquisition of this parcel in fee simple. The owner is demanding $10,000.00 which is considered excessive.

Right of Way - Palisades Parkway

44. There are presented report and appraisals with map and description on Palisades Interstate Parkway, Section 2H, from Bayview Avenue to Palisades Avenue; Parcel 1, Marie L. Hamilton. It is recommended that authority be granted to institute condemnation proceedings for the acquisition of this parcel in fee simple. The owner has refused our offer of $29,180. and has not made known her demands.

Right of Way - Garden State Parkway

45. There is presented again the matter of the acquisition of property on Route 4 Parkway, Section 14 (Garden State Parkway, Section 4), Union-Essex County Line to Clinton Avenue, East Orange, Parcel 122, Adolph E. Fink, widower, on which an agreement was previously approved in the sum of $46,000.00 with the provision that the owner would be required to pay taxes for the year during which the deed is delivered. There is presented a communication from J. Elmer Hausmann, attorney for the owner, a memorandum from the Supervisor of Titles & Settlements, and a memorandum from the Director & Chief Right of Way Engineer, with reference to the claims by the owner that it was understood that he will not have to pay the tax for 1953. The owner's contention as to the facts is correct, and it is, therefore, recommended that the deed be accepted with the understanding that the owner will not have to pay any part of the 1953 tax.

---

46. There is presented again the matter of acquisition of property on Route 4 Parkway, Section 17, Park Avenue, East Orange to Bloomfield Avenue, Bloomfield, Parcel 7, Welburn C. King & Bertha J. King, his wife, on which an agreement was previously approved in the sum of $13,175.00, which was considerably lower than the appraisals, predicated upon the fact that the owners will retain the building and remove the same from the limits of the right of way to another location.

(Continued on next page)

46.(Continued) A communication has now been received from the owners to the effect that because of the requirements of the City of East Orange affecting the moving, involving an expense of over $10,000.00 for removing and replacing trees, it is found impractical to have the house moved to another location. The owner, therefore, asks that the amount of the agreement reached on the above basis be modified by the addition of $1,000. making the total amount of the consideration $14,175., the building to be retained and disposed of by the State or the Authority, and taxes for 1953 to be assumed by the owner. In view of the unanticipated hardship to the owners, and the fact that the higher figure now asked by the owners is justified by each of the appraisals originally received, it is recommended that the agreement be modified to provide for the payment of $14,175. instead of the original amount of $13,175.00.

Right of Way - Garden State Parkway

47. There are presented purchase agreements on Garden State Parkway, Section 7, as follows:

Parcel	Owner	Consideration
487	Fred Dieker,Sr.,Widower	$ 8,000.00
494	Kat herine H. Nowak & Joseph E.Nowak, her husband	4,075.00
604	John Cheega & Mary Cheega, his wife	4,000.00, owner to retain and remove Clubhouse.

Approval is recommended.

---

48. There are presented reports and appraisals with maps and descriptions on Route 4 Parkway, Section 14 (Garden State Parkway, Section 4), Union-Essex County Line to Clinton Avenue, Irvington, as follows:

Parcel	Owner	Remarks
103	National Turn Verein,Inc.	Owners demand $45,000.00
135	Castle Products Company	Owner demands $250,000.00

It is recommended that authority be granted to institute condemnation proceedings for the acquisition of these parcels in fee simple.

Administration - Claims Item

Accounting - Claims

9. This claim arises out of an accident occurring on December 15, 1951, at the intersection of State Highway Route #25 and Park Avenue, Linden, New Jersey, involving a vehicle owned by the Local Carrier Co.,resulting in damage to traffic control equipment which had to be repaired at a cost of $1,236.81. Upon investigation by this office, it was ascertained that the damaged pole was of a trolley type, and when repairs were made this pole was replaced by a more up-to-date installation. In order to install the new type pole, it was necessary to remove the entire concrete base so that a new base could be poured to accommodate four anchor bolts necessary to secure the new type installation. As a result of removing the old base, the Highway Department's labor charges were considerably more than if they had replaced the damaged pole with the same type. The insurance carried representing the Local Carrier Co.,has offered to settle this claim for the sum of $1,000.00,which offer appears to be fair and reasonable. Giving consideration to the foregoing, and the fact that the company would be entitled to depreciation and salvage, approval of said offer in the amount of $1,000.00 in full settlement of the Highway Department's claim, and the cancellation of the balance in the amount of $236.81 is hereby recommended in accordance with Mr. Levine's report attached hereto, and the recommendation of John Warhol,Jr., Deputy Attorney General.

(owner to retain and remove building). On February 11, 1953 authority was granted to make payment of $1,763.92 on account, after acceptance of an 8/9th interest and the recording of the deed to the State, at which time it was understood that the building had been removed by the owner and reset on another property. A report from our Title Officer indicates that the attorney for the owner intends to institute proceedings to quiet title in the Chancery Division of the New Jersey Superior Court. In order for him to do this, the deed to the State cannot be recorded, otherwise his client would be divested of title and unable to prosecute any suit as the owner of the immediate premises in question. It is, therefore, requested that the action authorizing payment of $1,763.92 upon reording of deed be rescinded; and authority granted to pay the $1,763.92 on account of the removal and replacement of the building on the remaining property (which sum was actualy expended by the owner)-- the balance to be paid upon clearing of title and acceptance of deed.

44. There is presented again the matter of acquisition of property on Route S28, Section 4, Burnet Street from Albany Street to Clifton Avenue; Parcels 5A and 5B, Joseph & Theresa Zoller. Condemnation proceedings were previously authorized, at which time the owner could not convey clear title by reason of an encumbrance in the form of a lease over a part of the property, held by the Richardson Engineering Company, to which a release could not then be secured. An agreement has now been reached with the Richardson Engineering Company wherein that Company agreed to release the aforesaid lease so that Joseph and Theresa Zoller could convey these parcels to the State free and clear of all encumbrances. An agreement has been executed and submitted in the sum of $25,000. for conveyance of Parcels 5A & 5B (Parcel 5B being acquired pursuant to the agreement between the State and the City of New Brunswick). It is recommended that this agreement be approved and that condemnation proceedings previously authorized be discontinued. It is further recommended that authority be granted to dispose of the buildings to the best advantage to the State.

There is presented again the matter of acquisition of property on Route 4 Parkway, Section 22, Connection from Route 4 (1917) to Route 4 Parkway at Dover Road; Parcel 39, Felix & Muriel Gattone, on which an agreement in the sum of $425. was previously approved. Deed was delivered and recorded January 28,1953. Under the terms of the agreement the owner would be liable for taxes for the full year of 1953. As the State was in possession in 1952, it is recommended that authority be granted to relieve the owner of the obligation to pay the 1953 taxes.

Right of Way - Rts. 25, 38 & 45

46. There are presented report and appraisals with map and description on Routes 25, 38 & 45, Airport Circle Improvement; Parcel 20, P-K Motors, Incorporated. Right of Way - Route 42

49. There is presented again the matter of acquisition of property on Route 42 (1927) Section 3B, Channelized Intersection at Route 45 (1927). Condemnation proceedings were previously authorized for a portion of the Frederick P. Riegel property (designated as Parcel R25A). March 12, 1953.

Memorandum to Mr. C. A. Burns:

Submitted herewith is a request for changes under our reimbursement lighting program for the year 1953, involving a total additional annual cost to the State of $1,372.95, as indicated on the attached tabulation.

In each instance the request for additional lighting has been investigated in the field and found to be warranted, under the requirements of our Department.

The thirty-six (36) additional units are over a wide area, involving seven municipalities and one county, and are justified either through construction details or accident experience. The need for this additional lighting has been the concern of this office for some length of time, particularly with regard to the Causeway from Manahawkin to Ship Bottom, where the Township of Stafford is participating in the maintenance of approximately twenty (20) units.

It is therefore deemed highly desirable to supplement our present agreements as set forth above. I am respectfully requesting that you recommend this portion of our program for the approval of the Commissioner.

Accounting - Claims

1. This claim arises out of an accident occurring on May 10, 1952 on the Shark River Bridge, Belmar, New Jersey, involving a vehicle owned and operated by Thomas L. Fry. As the result of the aforesaid accident, the traffic gate and concrete balustrade was damaged and had to be repaired at a cost of $520.44. Mr. Fry, through his attorney, advised the Claims Bureau that at the time of the accident, he did not carry liability and property damage insurance on his vehicle. Mr. Fry is married, has two children and his gross weekly salary is $77.00 per week. In view of Mr. Fry's financial circumstances, his attorney has offered 50% of the claim in full settlement of the debt. If this settlement is approved, Mr. Fry will raise the sum of $100.00 immediately and the balance will be paid within a period of 30 to 60 days. In view of Mr. Fry's present financial circumstances and his apparent conscientious effort to satisfy his obligation by paying a substantial amount of this claim, it is considered the Highway Department would be justified in accepting his offer of settlement and that the balance of $260.22 be cancelled. It is, therefore, recommended that the sum of $260.22 be accepted in full settlement of this claim and that the balance of the claim in the amount of $260.22 be cancelled in accordance with Mr. Levine's report attached hereto.
